PHP developer

About us

Luton, Beds

We're the UK's biggest name in electric vehicle charging, trusted by thousands of owners, businesses and councils; with over 50,000 customers across the UK and Europe.

We've been at the heart of the UK EV market for over 8 years. In that time we've grown fast and we're now expanding in all areas across the business to work with an ever growing demand for electric vehicles. And we're looking for talented and driven people to help take us to the next stage.

Chargemaster Plc are offering exclusive deals for workplace charging in light of OLEV's recently announced funding.

Company Introduction

Chargemaster Plc is the UK's premier manufacturer and operator of electric vehicle charging points. Its headquarters are at Capability Green, Luton with a manufacturing plant at Luton Airport. The company has been selected by the Sunday Times as being one of the 100 fastest growing technology companies for the last three consecutive years.

We partner with electric car manufacturers including BMW, Tesla, Mercedes Benz, Audi, Jaguar Renault and Nissan and the market is expanding rapidly. Government forecasts suggest that by 2027 50% of all cars sold in the UK each year are likely to be electric.

We are looking for a PHP developer to work on new project and exciting projects at

www.chargemasterplc.com.

Initial Responsibilities

- Develop new features on current websites by working with our 3 back-end developers and marketing team.
- Good PHP and backend skills, nice to have some front-end skills as well, but not essential.
- Update other subsidiary company websites and build in user-facing features
- Integrate an e-commerce aspect into our current POLAR network website
- Integrate a blog into our current Laravel Chargemaster website
- Design and build other websites from scratch as part of other company projects

Skills and Qualifications

You'll also relish working as part of a team— supporting the company and simultaneously managing relationships with your colleagues and partners.
